

Product	Ingredient	Benefit
Extend		
	dihydroxy acetone (DHA)	(carbon 3 sugar found naturally in sugar beets and sugar cane) reacts with amino acids and protein particles in dead skin cells to create a brown coloration called Mallard Reaction. Non-toxic reaction is similar oxidation of apples. Often used in combination with erythrulose as the synergy of the two ingredients can help a client obtain a more consistent color since their coloration peaks at different times.
	cocos nucifera (coconut) oil	naturally antibacterial, antifungal, moisturizer
	monoi de tahiti	skin hydration, makes skin supple and soft
	sorbiten and cetearyl olivate	(fatty acids from olive oil) emulsifier but also reduces skin water loss, high moisturizer, hypoallergenic and mimics skin
	glycine soya (soybean)	contains essential amino acids and Vitamin E, natural emollient (skin firmer) and moisturizer
	glycerin	toner, cleanser, moisturizer
	butyrospermum parkii (shea) butter	moisturizer contains Vitamin A and E (helps with blemishes, wrinkles and skin rashes)
	sodium benzoate	preservative also antifungal
	calcium gluconate	anti-irritant, anti-inflammatory, and healing agent
	simmondsia chinensis (jojoba) oil	moisturizer helps protect skin against UV light damage, anti-inflammatory
	sodium PCA	binding agent, natural component of the skin, functions as skin repairing agent.
Face		
	dihydroxy acetone (DHA)	(carbon 3 sugar found naturally in sugar beets and sugar cane) reacts with amino acids and protein particles in dead skin cells to create a brown coloration called Mallard Reaction. Non-toxic reaction is similar oxidation of apples. Often used in combination with erythrulose as the synergy of the two ingredients can help a client obtain a more consistent color since their coloration peaks at different times.
	grapeseed oil	Moisturizer, tighten skin, assist in reducing dark circles under eyes, fights aging, treats acne
	gotu kola extract	(also called centella asiatica) rich in amino acids, beta carotene and fatty acids. Calms inflammation, speeds wound healing, stimulates new cell growth, builds collagen and improve circulation (used to help treat Eczema and psoriasis)
	echinacea purpurea extract	improves skin hydration and reduces wrinkles, increases protection of skin from oxidative stress
	rosa canina (rosehip) extract	helps with most skin conditions (dermatitis, acne eczema, leathery skin, heals scarring) also may help with wrinkles and skin suppleness
	matrixyl peptides	(long term solution for aging) stimulates collagen synthesis and skin repair
	erythrulose	(can be made synthetically, but found naturally in raspberries. It's a ketone sugar) used with DHA takes 48-72 hours to reach peak coloration, tan fades a little slower than DHA, also can be less drying to skin than DHA
	sorbiten and cetearyl olivate	(fatty acids from olive oil) emulsifier but also reduces skin water loss, high moisturizer, hypoallergenic and mimics skin
	xanthan gum	a natural, food-grade binder, emulsifying surfactant and emulsion stabilizer
	glucono delta-lactone	vegetable based - food grade ingredient, used as a preservative
	sodium benzoate	preservative also antifungal

	calcium gluconate	anti-irritant, anti-inflammatory, and healing agent
	iron oxide	non-toxic mineral additive that adds color
	mica	mineral used for its sheer translucent, skin-hugging properties. It reflects light and creates the illusion of smoother, softer more radiant skin
	cocoa absolute	contains anti-oxidants assists with circulation and promotes softer more youthful skin.
Tanning Solution		
	dihydroxy acetone (DHA)	(carbon 3 sugar found naturally in sugar beets and sugar cane) reacts with amino acids and protein particles in dead skin cells to create a brown coloration called Mallard Reaction. Non-toxic reaction is similar oxidation of apples. Often used in combination with erythrulose as the synergy of the two ingredients can help a client obtain a more consistent color since their coloration peaks at different times.
	aloe barbadensis gel	antibacterial, antioxidants, may increase skin elasticity and decrease wrinkles
	oleo eurpea (extra virgin olive) oil	moisterizer, vitamin E enriched, helps keep skin younger looking, supple and calms irritation
	glycerin	toner, cleanser, moisturizer
	helianthus annus (sunflower) oil	calming emollient (moisturizer) rich in nutrients and antioxidants, can reduce general skin irritations
	organic caramel colour	
	cecropia obtusa bark extract (natural slimming agent)	breaks down fat cells (reduces cellulite)
	erythrulose	(can be made synthetically, but found naturally in raspberries. It's a ketone sugar) used with DHA takes 48-72 hours to reach peak coloration, tan fades a little slower than DHA, also can be less drying to skin than DHA
	cetearyl and sorbitan olivate	(fatty acids from olive oil) emulsifier but also reduces skin water loss, high moisturizer, hypo allergenic and mimics skin
	octinoxate (sunscreen)	UVB blocker but not a UVA blocker. It also enhances skin absorption
	rosmarinus officinalis (rosemary) extract	increases skin's elasticity and decreases droopiness and age spots. Natural antioxidants. Can help protect skin cells against sun damage
	centella asiatica (gotu kola) extract	(also called centella asiatica) rich in amino acids, beta carotene and fatty acids. Calms inflammation, speeds wound healing, stimulates new cell growth, builds collagen and improve circulation (used to help treat Eczema and psoriasis)
	echinacea angustifolia extract	improves skin hydration and reduces wrinkles, increases protection of skin from oxidative stress
	calendula officinalis (marigold) extract	reduces inflammation promotes healing of common skin disorders (rashes and acne) Also an antifungal
	camellia sinensis leaf (green tea) extract	anti-aging properties with the natural anti-oxidants, prevents collagen breakdown, reduces UV damage to skin.
	glucono delta-lactone	vegetable based - food grade ingredient, used as a preservative
	sodium benzoate	preservative also antifungal
	calcium gluconate	anti-irritant, anti-inflammatory, and healing agent

pH Balancing Tonic		
	malachite extract	antioxidant
	citrus limonum (lemon peel)	plant acids, can help protect skin against cancer
Hydration Tonic		
	aloe barbadensis gel	antibacterial, antioxidants, may increase skin elasticity and decrease wrinkles
	glycerin	toner, cleanser, moisturizer
	colloidal silver	assists in getting rid of acne, skin infections, also antifungal - kills germs
	sodium PCA	binding agent, natural component of the skin, functions as skin repairing agent.
	sodium hyaluronate (hyaluronic acid)	salt found natural in skin but as you age you lose it making the skin look old. It is an anti-aging treatment, but mostly helps hydrate skin and keep it supple and minimizes wrinkles and fine lines for a short amount of time.
	glucono delta-lactone	vegetable based - food grade ingredient, used as a preservative
	sodium benzoate	preservative also antifungal
	calcium gluconate	anti-irritant, anti-inflammatory, and healing agent
	acai berry extract	anti-oxidants relieve irritation, redness and moisturize skin. Give a glow
	herbal essences	
Classic		
	dihydroxy acetone (DHA)	(carbon 3 sugar found naturally in sugar beets and sugar cane) reacts with amino acids and protein particles in dead skin cells to create a brown coloration called Maillard Reaction. Non-toxic reaction is similar oxidation of apples. Often used in combination with erythrulose as the synergy of the two ingredients can help a client obtain a more consistent color since their coloration peaks at different times.
	aloe barbadensis gel	antibacterial, antioxidants, may increase skin elasticity and decrease wrinkles
	oleo eurpea (extra virgin olive) oil	moisturizer, vitamin E enriched, helps keep skin younger looking, supple and calms irritation
	glycerin	toner, cleanser, moisturizer
	helianthus annus (sunflower) oil	calming emollient (moisturizer) rich in nutrients and antioxidants, can reduce general skin irritations
	organic caramel colour	
	cecropia obtusa bark extract (natural slimming agent)	breaks down fat cells (reduces cellulite)
	vegetable emulsifier	
	octinoxate (sunscreen)	UVB blocker but not a UVA blocker. It also enhances skin absorption
	rosmarinus officinalis (rosemary) extract	increases skin's elasticity and decreases droopiness and age spots. Natural antioxidants. Can help protect skin cells against sun damage
	centella asiatica (gotu kola) extract	(also called centella asiatica) rich in amino acids, beta carotene and fatty acids. Calms inflammation, speeds wound healing, stimulates new cell growth, builds collagen and improve circulation (used to help treat Eczema and psoriasis)
	echinacea angustifolia extract	improves skin hydration and reduces wrinkles, increases protection of skin from oxidative stress

	calendula officinalis (marigold) extract	reduces inflammation promotes healing of common skin disorders (rashes and acne) Also an antifungal
	cameilia sinesis leaf (green tea) extract	anti-aging properties with the natural anti-oxidants, prevents collagen breakdown, reduces UV damage to skin.
	sodium PCA	binding agent, natural component of the skin, functions as skin repairing agent.
After-Glo		
	aloe vera	antibacterial, antioxidants, may increase skin elasticity and decrease wrinkles
	cocos nucifera (coconut) oil	naturally antibacterial, antifungal, moisturizer
	monoi de tahiti	skin hydration, makes skin supple and soft
	sorbiten and cetearyl olivate	(fatty acids from olive oil) emulsifier but also reduces skin water loss, high moisturizer, hypo allergenic and mimics skin
	glycine soya (soybean)	contains essential amino acids and Vitamin E, natural emollient (skin firmer) and moisturizer
	glycerin	toner, cleanser, moisturizer
	butyrospermum parkii (shea) butter	moisturizer contains Vitamin A and E(helps with blemishes, wrinkles and skin rashes)
	sodium benzoate	preservative also antifungal
	calcium gluconate	anti-irritant, anti-inflammatory, and healing agent
	simmondsia chinensis (jojoba) oil	moisturizer helps protect skin against UV light damage, anti-inflammatory
	sodium PCA	binding agent, natural component of the skin, functions as skin repairing agent.
	mica	mineral used for its sheer translucent, skin-hugging properties. It reflects light and creates the illusion of smoother, softer more radiant skin
	glucono delta-lactone	vegetable based - food grade ingredient, used as a preservative
